

## 4 SIDED HOOD

**Unique 4 sided, fully insulated hood with "wrap around" handle - prevents heat and steam escaping when hood is raised.**

- 4 sided design reduces steam and heat loss, saves energy and eliminates the need for an expensive vent canopy
- Wrap around handle for easy operation in raising and lowering the hood (up to 50% less effort required compared to other models on the market!)
- Efficient insulation reduces contact temperature for safer handling and also saves energy

**Saves over 3kW per Hour**
