#### SOLUTION A

#### SOLUTION B

### 3-SOLUTION

#### SOLUTION A / WASHING

For volume work we have a unique process that will enable up to 70% recovery.

#### SOLUTION B / SPOTTING

"I had forty banqueting cloths forced out of circulation, due to black marks. These cloths had cost me £20 each, totalling £800! After some advice I tasked one of my staff to apply Blue Spot and to rewash. Remarkably, they were all restored to service successfully. The recovery took five hours, 7-8mins per cloth. This was a huge task, but for £30-£40 of labour and chemical, I saved £800 of linen from the rag man!"

*Cleaner The Betta, Graham Fletcher*
