

Burco Titan - Medium Duty Commercial Range Oven

6 Burner Range from the UK's Leading Cooker Manufacturer

BURCO

Glen Dimplex Professional Appliances

Burco Titan – Medium Duty Commercial Range Oven

Designed and built at one of the largest cooker manufacturing plants in the UK the Burco Titan range cooker can truly boast to be one of the best on the market.

With 6 powerful hob burners and a massive 9.0kW oven burner the Burco Titan delivers a high level of performance from its extra thick stainless steel chassis.

Performance and Power

Performance is crucial for any kitchen appliance and especially so for a 6 burner range. The Burco Titan does not disappoint with its **6.1kW burners*** delivering optimum performance and ensuring fast cooking for any busy kitchen. The oven is just as important and with a **9.0kW burner** it gives fast preheat times and the 2/1 Gastronorm compatible interior ensures that full loads are coped with more evenly.

Efficiency

More power does not lead to an inefficient appliance either. After 10 hours of continuous use the oven on the Burco Titan uses **over 15% less gas** than leading competitors, saving energy and money. The same high standards apply to the hob too; on a comparative setting as a leading competitor the Burco Titan brings a 20 litre stock pot to boil **over a minute faster**, again using less gas and saving you both time and money.

Ease of Cleaning

In any busy kitchen cleaning is a necessity and making that easier was a prime concern in the design of the Burco Titan. The one-piece pressed hob collects any spillages and, should any escape, the innovative **removable hob** can be removed in a matter of seconds so that access can be gained to the underside. The oven is enamelled making it easier-to-clean and the **removable oven base** makes light work of cleaning saving you time and money.

Ease of cleaning is essential and the Titan offers not only a one-piece pressed hob and removable oven base but an easy-to-remove hotplate too, perfect to carry out a thorough clean or for easy servicing.

Burco Titan; the perfect combination of performance and quality.

Safety

Safety is essential so the Burco Titan was designed with this in mind too. The heavy cast-iron pan supports sit on **locating pins** on the hob ensuring there is no danger of movement off the hot cooking surface. Oven shelves have also been designed with a **safety-stop** on them preventing the full shelf being accidentally pulled completely out of the oven cavity.

Serviceability

The inventive removable hob, which can be removed without the need of any tools, enables an engineer to quickly access thermocouples underneath the hob in the unlikely event of a breakdown, thus reducing valuable downtime. The door handles are accessible from the front so are **easily replaceable** should the need occur.

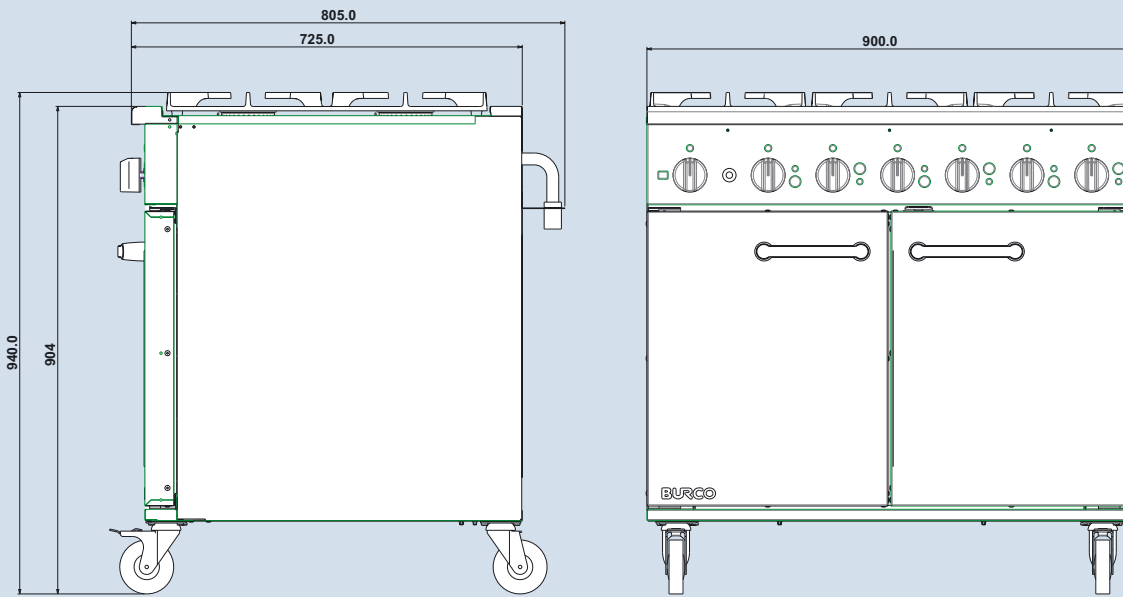

Knowledge and Experience

Burco is a long-established name in the commercial marketplace and has been a familiar sight in commercial kitchens for over 100 years. Although predominantly known for its range of gas and electric water boilers, Burco is now part of Glen Dimplex Home Appliances, one of the largest cooker manufacturers in the UK including household names such as Belling and Stoves. This vast experience and knowledge of cooking appliances has been used to design and manufacture the Burco Titan, thus ensuring that every last detail has been covered.

*6.1kW Natural Gas, 5.4kW Propane.

SKU (Natural Gas/Castors)	444449438
SKU (Propane/Castors)	444449439
Product Dimensions (mm)	900w x 805d inc gas inlet pipe x 940h to top of pan supports
Packed Dimensions (mm)	940w x 840d x 1075h
Product weight (kg)	117
Packed weight (kg)	146
Hob Burner Rating (Natural)	6.1kW (20,813 Btu/hr)
Hob Burner Rating (Propane)	5.4kW (18,425 Btu/hr)
Oven Rating	9.0kW (30,708 Btu/hr)
Total Rating (Natural)	45.6kW (155,586 Btu/hr)
Total Rating (Propane)	41.4kW (141,258 Btu/hr)
Useable Oven Capacity (in mm)	651w x 524d x 500h
Oven Capacity m ³	0.17
Oven Shelf Size (in mm)	706w x 524d
Useable Shelf Size (in mm)	651w x 524d
Number of shelves	2
Number of Shelf Positions	4
Gas pressure (Natural)	20mb
Gas pressure (Propane)	37mb
Inlet connection	3/4" BSP (female)
