

Designed with you in mind

Ergonomic design and specific incorporated features ensure that Electrolux dryers are simple and safe to use.

Drum speed control

Thanks to our adjustable drum speed - excellent results are guaranteed, even with the most delicate loads.

Sliding doors

No more uncomfortable loading and unloading in critical locations. With our sliding doors, you no longer need a large amount of space for an efficient laundry flow.

Forward tilting

The forward tilting and simultaneous rotation of the drum result in no requirement of manual handling of the linen. This results in excellent hygiene standards and improved working conditions for operators.

Door

The large diameter of the opening ensures easy loading and unloading. The door opens to nearly 180° and can be hinged to the left or right for optimal laundry flow.

Lint filter

Maintenance is minimized thanks to the large lint filter. Lint can easily be removed from the bottom of the compartment.

Low noise

Everyone seeks a quiet working environment. Electrolux tumble dryers are designed to keep the noise level below 70 dB (A).
