### Designing for the future

Our excellence is evident in all our products and can be found in the smallest detail, ensuring flawless functionality and ease of operation.

The Ventus range incorporates our new eco smart controller and Dynamic Air Distribution System (DADS) coupled with efficient compressors and improved insulation. These innovations ensure that IMC remains the market leader.

#### V90 Standard Cabinet Design

The high-quality stainless steel interior offers both extreme good looks and high levels of hygiene as standard. The new Ventus range of bottle coolers is available in a range of colours and stainless steel finishes.

#### V90 Shallow Cabinet Design

The Ventus range is further enhanced with the addition of a shallow cabinet design, offering additional flexibility to deliver exceptional refrigeration in confined spaces. The Ventus shallow cabinet design is available in the same colours and finishes as the standard V90 model.

#### V90 Short Cabinet Design

The Ventus V90 800 and 850 provide a lower standing height option to complement the standard V90 range when height options are limited in under bar structures.

#### Door Options

With 4 new door designs you can be sure your Ventus will complement any bar design. The new range includes a stunning frameless design offering perfect sleek and smooth lines, while the fixing point door allows both a variety of handles to be fitted and the option for you to clad the door in your own material.

### Eco smart

The eco smart system is a market-leading energy saving solution and is fitted as standard to all Ventus models. At the touch of a button, you can ensure that your bottle cooler is held at its most economical state until it is next required.

The Ventus range of bottle coolers combines the very best in cooling technology, making it ideal for storing all types of beer and white wine.

Standard Cabinet	Height (mm)	Width (mm)	Depth (mm)
V90 Standard	900	900	500
V90 Shallow	900	900	450
V90 800 Short	800	900	500
V90 850 Short	850	900	500

### Electronic control

The Ventus range of bottle coolers is equipped as standard with electronic temperature controllers with automatic defrost ensuring precise monitoring and control of internal temperatures.

### Standard door features

The Ventus V90 range comes with fitted door locks as standard.

### Electrical

The Ventus range is available for use in many countries and can be supplied with a compliant 3 pin UK or 2 pin EU plug for operation on 230V 50Hz, 220V 60Hz and 115V 60Hz power supplies.
