Zip HydroBoil rangeWall-mounted instant boiling water

High performance instant boiling water systems are a vital consideration in the UK, a nation that regards tea and coffee as an absolute necessity.

With safety, durability and simplicity in mind, Zip's HydroBoil range is designed to easily handle the demands of busy workplaces, commercial kitchens and public buildings, saving power when needed while ensuring boiling water is always available.

Relaunched with a new modern look, the HydroBoil range continues to offer specifiers and end-users the reliable performance they expect, delivering energy and cost efficient boiling water at the touch of a tap.

Every working day in the UK **over eight million cups** of tea or coffee are made using Zip instant boiling water systems.

Zip HydroBoil

The benefits of instant boiling water

Convenience

No waiting time, no queues at the kettle the HydroBoil range delivers reliable boiling water that's always within 0.5°C of boiling point, thanks to advanced temperature control. The convenience of instant boiling water saves the user valuable time and can

Wide range

Available in 3-litre to 40-litre models

help to increase workplace productivity.

for high demand environments such as large offices, restaurants, canteens and hospitals, there's a HydroBoil for every situation.

Energy efficient

Patented Steam-Heat-Boost™ technology

saves energy by recycling steam to preheat incoming cold water – making boiling quicker and less costly. The HydroBoil also saves significant amounts of energy by using compressed high temperature insulation, electronic temperature control and advanced Power-Pulse™ technology.

Cost saving

No energy is wasted boiling more water than needed and water heating is done in the most energy efficient way. This means that our HydroBoil systems cost little to run and save energy, helping to offset rising electricity prices.

Space saving

The wall-mounted boiler saves much needed counter-top and under-counter space. With the HydroBoil range there's no need for counter-cluttering kettles and exposed power leads.

Built to last

At Zip, we only manufacture the highest quality, most durable systems, offering reliability and long-term performance that you can

trust. The HydroBoil range has gone through vigorous testing, giving you peace of mind that your boiler is safe and fit-for-purpose.

Easy and safe to use

Simple, easy to use controls

allow the user to fill a single cup or a keep the water running for a full pot or jug. We've developed a range of safety features to give you complete peace of mind, including the unique cool touch two-way tap on our HydroBoil Plus model, fingertip control for safe cup filling and a safety lock to eliminate the risk of accidental use.

EconoBoil

The EconoBoil is a thermostatically controlled instant boiling water system for locations where affordable reliability is required.

Available in 3 and 5 litre models, the EconoBoil delivers boiling water at a constant temperature, as you would expect from a market leader. The EconoBoil employs patented twin chamber boiling water Steam-Heat-Boost™ technology to recycle energy from steam to preheat the incoming cold water.

The drinking water tank is made from high-performance PPS (organic polymer) and is insluated to give you instant boiling water from a smart, compact command centre.

- Two-way chrome-plated tap
- High-performance PPS boiling tank
- Steam-Heat-Boost™ technology
- Corrosion-resistant white enamelled steel case

Featured product Zip EconoBoil

HydroBoil

Enjoy no waiting time with this convenient, reliable and safe wall-mounted instant boiling water boiler. Using Steam-Heat-Boost™ technology to conserve significant amounts of energy, the HydroBoil is available in 3 to 40 litre capacities, ensuring suitability for every application. Tap locks on to fill pots hands-free.

- Two-way chrome-plated tap
- Available in 3 to 40 litre capacities
- High-performance PPS (organic polymer) boiling tank for models up to 7.5 litre and stainless steel boiling tank for larger models
- Twin chamber tank
- Premium insulation
- Steam-Heat-Boost™ technology
- Corrosion-resistant white enamelled steel case
- · Heating cycle indicator

Featured product Zip HydroBoil

HydroBoil Plus

Our most technologically advanced model, the HydroBoil Plus is designed to cut energy consumption. State-of-the-art technology maintains boiling water to within 0.5°C of set temperature.

In addition, the HydroBoil Plus features energy-saving Power-Pulse™ technology, inactivity and low-light sleep modes, along with timer settings for ease of use and efficiency.

The HydroBoil Plus is equipped with a two-way safety tap and safety lock. This cool-touch tap also increases efficiency by enhancing the insulation of the boiler. The safety lock, located to the right, is an additional feature making it easy to restrict use of boiling water where safety is a prime consideration.

- · Unique two-way cool touch tap
- High-performance twin chamber PPS (organic polymer) boiling tank
- Premium insulation
- Energy-saving Power-Pulse™ technology
- Sleep mode and integral timer
- Steam-Heat-Boost™ technology
- Liquid crystal display shows time, day, heater operation and energy saving mode status
- Corrosion-resistant white enamelled steel case

Zip HydroBoil Plus

Accessories and consumables

Safety tap top assembly 93734

Prevents boiling water being dispensed accidentally. To dispense, a lever on the back of the handle needs to be released.

Insulating tap body cover 94514

For EconoBoil and HydroBoil.

A heat cover for exposed tap outlets preventing the user from any accidental burns.

Inline filter FL064

6" filter for taste and odour removal with limescale reduction. For use with HydroBoil up to 7.5 litre models.

Touch free adaptor XTPA/1

Allowing the contactless delivery of boiling water for the EconoBoil and HydroBoil.

Inline filter **FL104**

10" filter for taste and odour removal with limescale reduction. For use with HydroBoil 10 litre models and above.

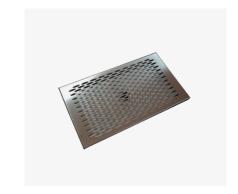

Standalone font 93441UK

Bright chrome (with drain adaptor).

Ø176 font outline.

Tundish **ZD100** Wall mounted, chromed. **ZD101** Sink mounted, chromed.

Drip tray **ZD200**

Stainless steel (with drain adaptor).

Drip tray dimensions:
W: 340mm x D: 190mm x H: 20mm
with a 19.5mm drainage access.

12

Installation – It's as simple as A-B-C

A. Location

The system should be installed over a sink, draining board or over a worktop equipped with a portable or plumbed drip tray. Tap outlet clearance to drainer should be no less than 280mm, nominally 360mm. Service access clearances must be at least 150mm above, 65mm to left, 20mm to right.

The vent pipe within the case must discharge to a safe visible position as, under certain conditions, it may discharge cold water, boiling water, and/or steam. The vent pipe outlet must be connected via a tundish to a 15mm OD copper vent pipe which has a continuous fall, is no more than 3 metres long, has no more than 3 right angle bends and discharges to a waste water drain.

B. Electrical

For a neat, concealed electrical connection, you can connect the cable from the rear directly to the internal terminal block. Installation must comply with current IEE wiring regulations.

The under 3kW rated models require an easy accessible 1 x 230V AC 13A double pole isolation switch or socket (correctly rated for the appliance). For 2 x 3kW rated models, connect a separate 230V AC ring main rated at no less than 32A, isolated by an easily accessible double pole isolation switch.

Service a supply To drain Service a Supply To drain Dimensions in mm, nominal.

C. Plumbing

The system must be installed by a qualified tradesperson and in accordance with the instructions supplied with the system. The water supply must be wholesome (drinkable) and deliver at least 2 litres per minute at a minimum dynamic pressure of 1 bar.

A pressure reducing valve must be installed if water pressure is likely to exceed 5 bar.

A service valve must be installed between the water supply and the system. For a concealed plumbing connection, connect inlet and vent pipes from the rear via 15mm capillary elbows as shown.

For an exposed plumbing connection, connect inlet and vent pipes from the base of the case directly to 15mm compression fittings.

Warranty

The **HydroBoil** and **HydroBoil Plus** are covered by a 2-year on site parts and labour warranty.

EconoBoil is covered by a 1-year on site parts and labour warranty.

Zip HydroCare

To ensure your product continues to provide crystal clear, pure tasting water for its lifetime, we recommend signing up for our HydroCare or HydroCare Plus service plan.

Take one thing off the to-do list with reliable, prescheduled services and filter changes. HydroCare is flexible, cost-effective and tailored to you.

With over 70 years' experience, Zip Water is the most trusted name in drinking water solutions. Speak to one of our expert team on 0345 6 005 005 to sign up to HydroCare and ensure you're getting the very best out of your product.

Your comprehensive HydroCare service plan includes:

- Taste filter replacement
- · On site parts and labour
- Extended warranty
- Unlimited call-outs
- Annual inspection
- Pre-scheduled planned services
- · System replacement*
- Priority response

For areas where water quality is a concern we also offer HydroCare Plus, which includes everything mentioned above, with the addition of tailored limescale management.
