

SmartServe™

Blend-in-Cup

Blend-in-Cup **Simplicity.**

As Easy as 1, 2, 3.

Step 1

Dispense ingredients into cup.

Step 2

Insert cup and press "start".

Step 3

Serve customer. Equipment rinses itself.

Labor Saving

SmartServe™ has an output of more than a drink a minute. It does the work of two employees with one machine.

No Waste

Everything you put in the cup is served to the customer compared with up to 10% waste with blender jars.

Space/Jar Saving

Requires approximately 7" of counter width plus no more blender jars to store.

Consistent Output

with a perfectly controlled process. Blend parameters can be changed easily via USB port.

Self Rinsing

No more blender jars! The equipment can be programmed to rinse itself between each drink with as little as 10oz of water.

Water Savings

Compared with manual cleaning, SmartServe™ can cut water usage by 8X.

No Dispensing

The step of pouring from the blender jar is completely eliminated.

Good Thinking™
