

Assembly & Care Instructions for Artificial Plants

Planting

- Use a suitable material (not supplied) such as sand, soil, pebbles, expanding foam or polystyrene blocks to secure the plant into the planter (if required).
- A variety of products ranging from pebbles/chippings to moss or real soil (not supplied) can be used to top dress the product if desired.

Displaying

Arrange the branches or stems so that the plant best resembles the real thing (see over for examples).

1. Remove the packing from the plant. Keep all packaging away from children. Dispose of the packaging in accordance to the regulations of local authorities.
2. Bend the branches in an arc from the main stem so that the leaf-ends point to the floor.

 **Note: Any creases in the leaves will disappear after a short period of time.**

Cleaning

Like real plants dust may accumulate on the leaves. This can be removed by regular dusting with a duster or damp cloth.

Note: PLANTS ARE NOT TO SCALE.
