

Lite Jug Kettles

As functional as it is stylish, Dualit's Jug Kettle offers a smooth pouring action and handy cup size indicators so you will always boil just the right amount. Dualit's cordless jug kettle offers an upright format kettle with a different pouring action to more traditional dome shaped kettles. The hinged easy-fill lid has a large heatproof knob with finger guard to prevent burning. A rapid-boil concealed element heats the water quickly and has its own boil-dry safety cut-out.

Fast Boiling

The Lite Kettle uses a powerful element for a faster boiling time. The element is concealed in the base of the kettle, away from water contact to reduce limescale damage. The boil-dry safety feature switches the kettle off if it's empty.

Cup level indicators

The viewing window has easy-to read cup level indicators. Fill the kettle with just the right amount of water you need to boil, down to just one cup, saving time and energy.

Easy, reliable pouring

The Lite Kettle is easy to fill, lift and pour. It has a contoured spout that ensures water won't drip onto your kettle or your worktop. The handle is heatproof and easy to grip and the hinged lid opens fully for easy filling.

Product Spec:

- Available in Black or Cream
- 1.5L capacity - black & cream models
- 1L capacity - black model only
- Cordless operation with 360° swivel base
- High quality stainless steel body
