Using the crusher	3
--------------------------	----------

Notes	4-5
--------------	------------

Using the crusher

Ensure the voltage of the machine matches that of the electricity supply.

1. Lift the crusher handle up to the stop point, before plugging the machine in. Turn on the mains power, place the ice into the ice drum.
2. Pull down the handle of the ice crusher, to crush the ice.

Cleaning the machine:

After operation, this should be turned off; then the machine should be wiped down with a dry cloth.

Caution

When using the machine ensure the inlet is not blocked, as this will damage the motor. If this does occur switch of the machine immediately.

Specifications:

Voltage: 220V-240V

Frequency: 50Hz

Device Size: 400x180x310mm

Device Weight: 8KG

Quantity of crushed ice: 65KG/hr
