1

## **BEFORE USE**

- 1. Remove shipping package, tape, etc. Also leave the doors open for ventilation.
- 2. The unit is cleaned before shipment. However, clean the compartment interior once after delivery.
- 3. Please insert the power supply plug into the wall outlet, single-phase to cat voltage.
- 4. Allow the unit to operate for about 1 hour to cool the compartment before placing items in the cooler.

## WAIT 5 MINUTES OR MORE BEFORE RE-STARTING

Restarting the unit immediately after it has been turned off may cause fuses to blow and activate the circuit-breaker, the compressor may be overloaded, and/or damage may occur.

### **TEMPERATURE ADJUSTMENT**

The thermostat is pre-set at the factory. To adjust it, turn right for temperature inside the cooler to go down. To raise the temperature, turn it left. Excessive refrigeration will increase electricity consumption unnecessarily.

## **DRAIN TRAY**

Defrosting is performed automatically and drain water is collected in the drain tray.

Water in the drain tray is evaporated automatically. It is recommended that you clean out your drain tray at least once a day.

### **EFFICIENT USE**

Please follow the below instruction, you could save energy.

To prevent cold air from escaping, open and close the door quickly and keep the door opened for as short a time as possible.

Please install the unit in the place which is well-ventilated.

## SHELF HEIGHT ADJUSTMENT

The shelf height can be adjusted.

Arrange the shelves in accordance with the dimension of the items to be placed inside the cooler.

# PLACING ITEMS IN THE BOTTLE COOLER

This bottle cooler employs a forced circulation of cold air system. If circulation of cold air is obstructed, the items will not be adequately refrigerated. Pay attention to the following points:

- Do not let items obstruct the cold air inlet and suction outlet.
- Place items so that they do not protrude from the shelves. The gap between the shelves and the door is used for circulation of cold air.
- Place items evenly on all shelves.
- Please do not display goods on the bottom. Please try to keep them on the shelves.

# SETTING THE TEMPERATURE

#### Operation

#### **Control Panel**

For full specification and detailed instructions, please consult the included Dixell manual.

The control panel is located below the doors on the front of the appliance.

#### Turn On

- 1. Connect the bottle cooler to a mains power supply.
- 2. Turn the power switch on.
- 3. Set the temperature to the desired setting (see below).
- 4. Close the door of bottle cooler.
- 5. Turn the light switch on [I] or off [O] as required.

#### Set the Operating Temperature

- 1. Press the {set} button. The display will flash.
- 2. Press the {up arrow} or {down arrow} to display the required temperature.
- 3. Press the {set} button to store the temperature.

#### **Manual Defrost**

The bottle Cooler features an automatic defrost. However, should the appliance require an additional defrost period press and hold the {defrost} button for 6 seconds.

Automatic defrost cycles are every 6 hours and last 20 minutes (factory defaults).

To stop the defrost press and hold the 'defrost' button for 6 seconds.

# **SAFETY PRECAUTIONS**

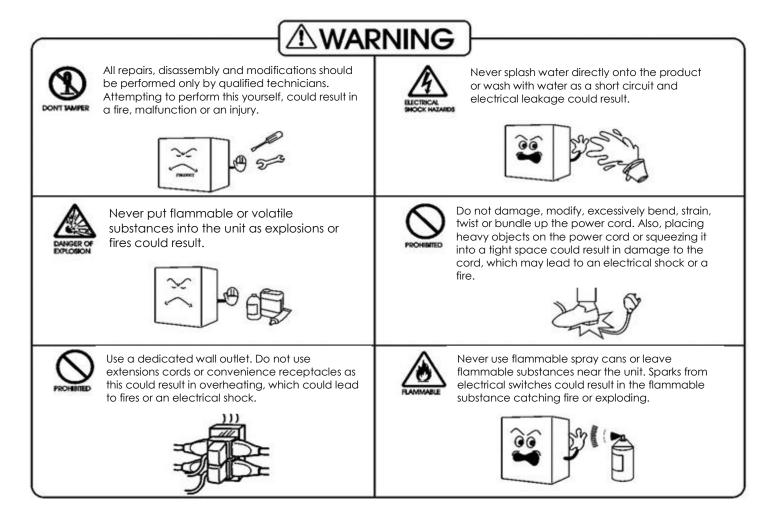

- To ensure proper use, please thoroughly study these SAFETY PRECAUTIONS before operating the unit.
- The purpose of the safety precautions in this manual is to ensure safe and correct use of the unit to minimize risks that could cause serious damage to either the machine or persons operating it. The safety precautions are divided into warnings and cautions.
- Improper handling of the unit could lead to death or serious injuries, these are listed under the 'WARNING' tab. However, the cases listed 'CAUTION' heading could also lead to serious injuries. To ensure your safety, adhere strictly to both types of safety precautions.
- After reading the instruction manual, store it in a safe and easily accessed place where you can easily go back to it if needed.

## **PRECAUTIONS FOR INSTALLATION**

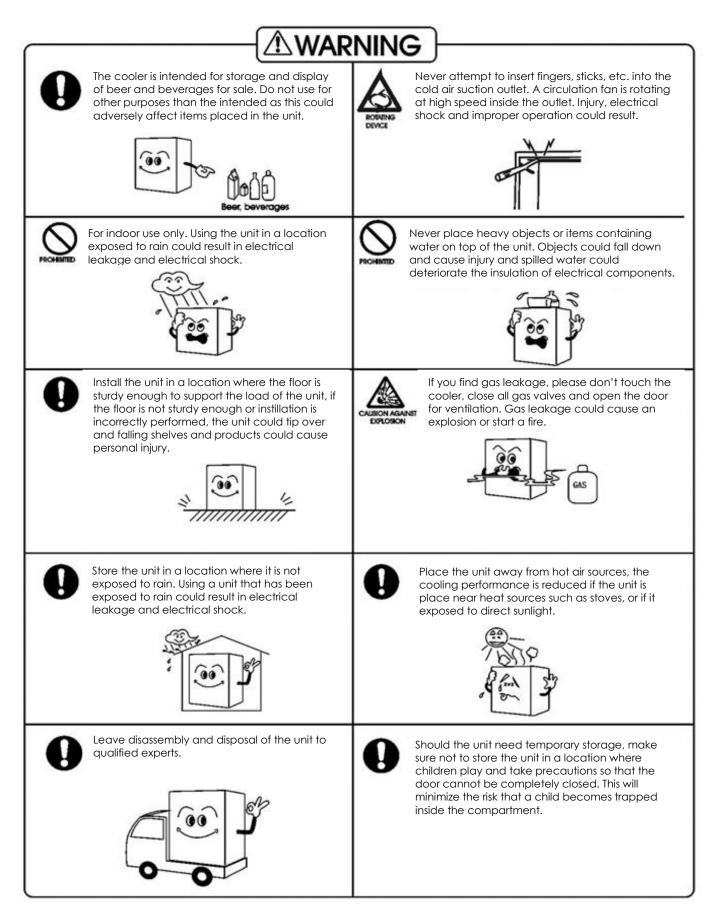

### WARNING

Installation should be performed only be the dealer or a qualified expert, attempting to install the unit yourself could result in water leakage, refrigerant leakage, electrical shock, or a fire.

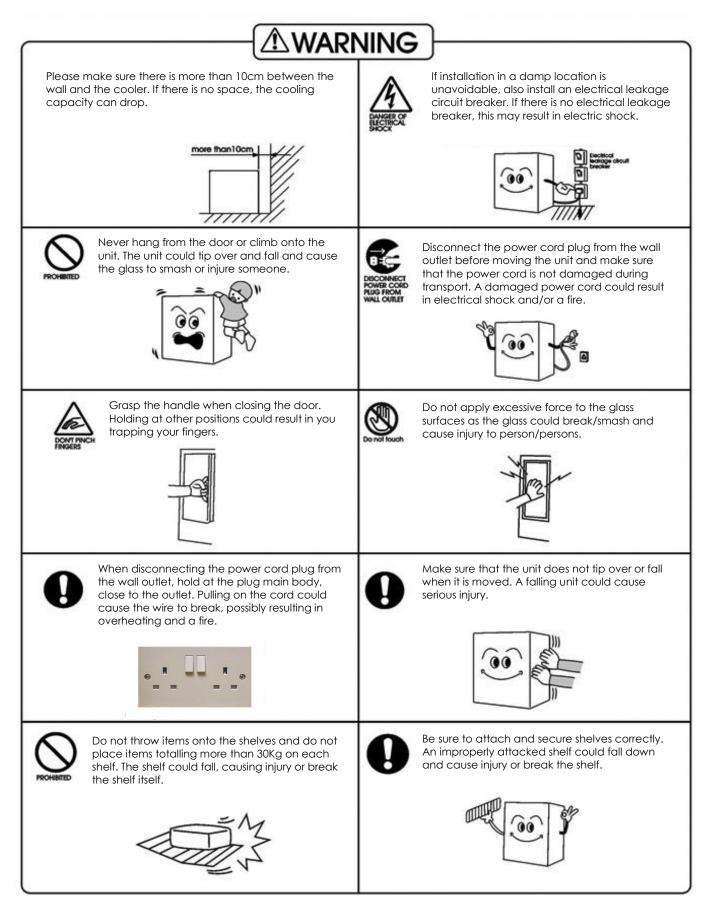

#### PRECAUTIONS FOR USE

# **SAFETY PRECAUTIONS**

# **SAFETY PRECAUTIONS**

WARNING: Do not splash water directly onto the cooler and do not wash the appliance with water. Short – circuit and electrical shock could result.

- Clean the cooler regularly to keep it clean at all times.
- Never use polishing powder, soap powder, benzene, oil or hot water as these will damage the painting and plastic components.

# **AFTER CLEANING**

To ensure the safety, perform the following checks after cleaning the appliance.

- Is the power cord firmly inserted into a dedicated wall outlet? Confirm that the plug is not abnormally hot.
- Check the power cord for cracks and damage. Should the slightest irregularity be observed, contact the dealer from whom you purchased this unit or our customer service team on 01229 480001.

# IN CASE OF THE FOLLOWING

## **POWER FAILURE**

Keep opening and closing the door to a minimum.

Avoid placing new items in the cooler as this will raise the temperature inside the compartment.

# WHEN NOT USED FOR A LONG PERIOD

Remove all items from the compartment and disconnect the power cord plug from the wall outlet.

Clean the compartment interior and wipe away all water.

To prevent mould formation and bad smell, leave the door open to dry the compartment completely.

# TRANSPORTATION

Disconnect the power cord plug from the wall outlet.

When moving the cooler, make sure that the feet do not damage the power cord.

Do not let the feet hit against floor steps, thresholds, etc.

## **TEMPORARY STORAGE**

Affix a piece of wood, etc. between the door and the main unit to prevent complete closing of the door.

Make sure not to store the unused cooler at a location where children play. Should a child enter the compartment and the door is closed, the child may not be able to open the door from the inside.

# **BEFORE REQUESTING SERVICE**

| No refrigeration<br>at all            | <ul> <li>Is the power supply interrupted?</li> <li>Is the power cord plug disconnected from the wall outlet?</li> <li>Are the shop's power fuses blown and/or the circuit breaker activated?</li> </ul>   |
|---------------------------------------|---|
| Inadequate<br>refrigeration           | <ul> <li>Is the temperature setting appropriate?</li> <li>Are items obstructing the cold air inlet and suction outlet?</li> <li>Are stored items packed too tight?</li> <li>Is the door open or is it opened and closed frequently?</li> <li>Is the condenser clogged?</li> </ul> |
| Excessive noise                       | <ul> <li>Are all the feet in firm contact with the floor?</li> <li>Is the rear panel of the cooler contacting the wall or other objects?</li> <li>Is anything in contact with the cooler? E.g. boxes, mops, brushes etc.</li> </ul>   |
| Condensation<br>on cooler<br>exterior | <ul> <li>You may find that on hot and humid days there may be times where a lot of<br/>condensation will condense on the exterior and door of the cooler, this is<br/>completely normal, clean away the condensation with a cloth.</li> </ul>                                     |
