

CaterKwik Buying Guides – Chest Freezer

Commercial chest freezers are a great option when it comes to storing large amounts of frozen products. Chest freezers have a great internal storage to external dimensions ratios than any other commercial freezer.

Chest freezers can offer a very cost-effective solution for frozen storage and are also very reliable.

However, if you are looking for something to keep frozen goods and offer quick access an upright freezer may suit you better.

Chest freezers can come in several different sizes, varying from 100 litre capacities, up to 705 litre capacities.

Commercial chest freezers also offer a choice between stainless lids for longer lasting durability and white finish lids for a cheaper solution.

Low temperature chest freezers can also be used the medical field.
