3

SNACK CANOPY

Should be at least as long as the equipment run to ensure that it captures steam and cooking odours

GENERAL CANOPY

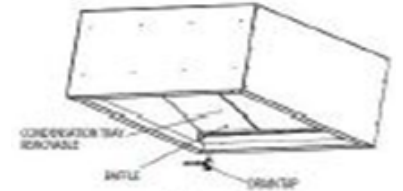

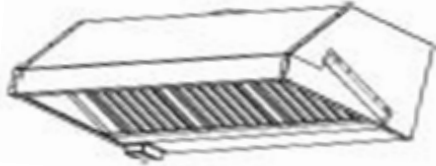

Should be at least as long as the equipment run to ensure that it captures steam and cooking odours

TITAN CANOPY

Suitable for Gas combination ovens and any other Gas or Electrical equipment that is over 600mm to 900mm in depth. Leaving 250mm to overhang to the front

CONDENSE CANOPY

Removes excess steam from working environments. Ideal for use over dishwashers and Electric combinations ovens. No power required

4

| Length of Canopy | Order Code |
|------------------|------------|
| 1000mm | ST1050 |
| 1200mm | ST1250 |
| 1500mm | ST1550 |
| 1800mm | ST1850 |
| 2100mm | ST2150 |
| 2400mm | ST2450 |

| Length of Canopy | Order Code |
|------------------|------------|
| 1000mm | GT1050 |
| 1200mm | GT1250 |
| 1500mm | GT1550 |
| 1800mm | GT1850 |
| 2100mm | GT2150 |
| 2400mm | GT2450 |

These canopies MUST overhang all gas equipment by at least 250mm in all directions unless the canopy terminates at the wall

| Length of Canopy | Order Code |
|------------------|------------|
| 1200mm | TT1275 |
| 1500mm | TT1575 |
| 1800mm | TT1875 |
| 2100mm | TT2175 |
| 2400mm | TT2475 |

These canopies MUST overhang all gas equipment by at least 250mm in all directions unless the canopy terminates at the wall (allow 600mm for combi ovens)

| Length of Canopy | Order Code |
|------------------|------------|
| 1000mm | CON1000 |
| 1200mm | CON1200 |
| 1700mm | CON1700 |
| 2100mm | CON1200 |

5

Specify internal fan (located inside the canopy) or external fan (located in the ductwork between the canopy and the outside wall).

Specify whether the vent is to go out the top or the back of the canopy. Only the TITAN model can have the option of venting out through the end of the canopy
