## CQUBE S FILTERBREW

Cappuccino, espresso, or just a plain cup of freshly ground and brewed dark roast coffee? Based upon new logic and advanced technology we have developed a coffee machine which lives up to all the criteria that coffee lovers around the world demand of us and our machines. It is about perfectly brewed coffee, exclusive design, flexible technology, energy efficient operation and minimal environmental impact during the lifetime of the coffee machine.

Our aim is nothing less than perfect coffee. Something that involves a combination of coffee beans, water temperature and technology. Precision for the brewing temperature and time, coarseness of the grind, and recipe options which conform to our unique taste in coffee. Taste is precision and passion. This is our passion.

# CQUBE S FILTERBREW

## CQube SF20

The machine for connoisseurs and coffee lovers. This model has two bean hoppers, two grinders and is equipped with a top class filter brew-mechanism for the ability to enjoy coffee from two different coffee beans. CQube S is available in two versions. One with ordinary push-button panel the other with a 7.5 " high resolution touch screen.

CQube SF20

## CQube SF12

If you would like more drink options we have this model. CQube SF12 is equipped with one bean hopper and two ingredient canisters for topping and chocolate, which gives up to 10 drink options. Even this model comes in two versions with regular push button panel or with a 7.5 " high resolution touch screen.

CQube SF12

## CQube SF03

Our simplest model with one canister for ground coffee and two additional ingredient canisters for topping and chocolate, which gives up to 10 beverage options. This model also comes in two versions. Either with the normal push button panel or with a 7.5 "high resolution touch screen.

CQube SF03
