

borg&
overström

The E-Series.

Evolved design,
environmental sustainability,
energy-efficient technology.

Excellence in every pour.

From the start, Borg & Overström set out to provide premium water solutions which were efficient, functional and aesthetically beautiful. Delivering on that promise, with a global network of distribution partners, we are now renowned for our distinctive designs and thoughtful innovations. Our mission is to change the way we all drink water by providing exceptional drinking water experiences, without the need for single-use plastic bottles.

Good for you, great for the planet.

The E-Series.

A story of evolution, environmental sustainability and energy-efficiency.

For over 20 years Borg & Overström has been at the cutting-edge of water dispenser design. Over this time, technology, manufacturing and the global understanding of environmental challenges has evolved beyond measure.

The E-Series is the latest evolution of our founding principle, to provide exceptional, bottleless drinking water solutions. Building on our expertise and incorporating the latest technologies, we deliver sustainably superior, premium drinking water.

SensorBeam

Fill your glass as if by magic.

Hygienic touchless dispense with unique projection mapping, SensorBeam* technology, allows the user to pour a glass of water by simply using their foot. No pedals or buttons, just the beautiful simplicity of illuminated controls projected onto the floor.

*Patent pending.

Compatible with the E-series.

Futuristic, projection mapping technology for completely touch-free dispense.

Energy-efficient
technology.

Technology.

Energy-efficient and environmentally-friendly technology.

As part of our efforts to improve the sustainability of our dispensers, we are constantly working to develop ever-greener eco-friendly technologies. From improving our processing and cooling systems to be more energy-efficient, to implementing intelligent EcoBoil temperature sensing and energy-saving 'sleep' mode that prevents unnecessary energy waste when heating and cooling, our dispensers reduce energy consumption and running costs.

Scan this code to learn more about EcoMode.

EcoMode Energy saving 'sleep' mode.

Our latest development in sustainable design, EcoMode is an intelligent, energy-saving technology, that places your water dispenser into a sleep when it is not being used. Automatically activated by prolonged darkness or inactivity, EcoMode will ensure that you are not unnecessarily chilling your water overnight or when no one is around to enjoy it. Better for the environment, better for your energy costs.

ProCore®

Next-generation, advanced modularity.

Borg & Overström's Maktens Borg dispensing solutions represent the next-generation in advanced modularity and universal compatibility. Each dispenser is powered by our unique ProCore® processing system, which enables increased consistency and efficiency in parts, stock, training, and installation. As our range expands, our goal is to ensure that any engineer trained in ProCore® technology can maintain even the latest water dispensers.

Scan this code to learn more about ProCore®.

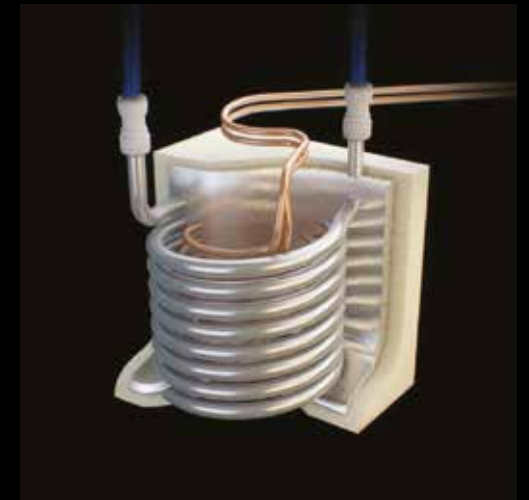

Scan this code to learn more about DryChill®.

ProCore®

Powerful, compact processor.

Our exclusive, next-generation, modular ProCore® system is both space and energy efficient. This compact, powerful processor features a unique design with discreet ventilation for optimised chilling and recovery times. Cooled with eco-refrigerant gas and protected with Greencoat® steel coating to maximise longevity, each ProCore® is built with sustainability in mind.

DryChill®

Efficient, rapid cooling.

DryChill® is the latest advancement in water cooling technology. This airless system features a rapid-chill coolant coil, housed in an aluminum core for ultimate hygiene and performance. The efficient, tankless system reduces the risk of contamination and the need for sanitising chemicals, while ensuring every glass, from the first pour to the last, is consistently chilled just seconds before you drink it.

Hygiene assurance in every pour.

A complete approach to cleaner, healthier, great-tasting water.

At Borg & Overström, we believe that the water you drink shouldn't just taste fresh – it must be fresh, filtered and clean. Borg & Overström dispensers are designed with our unique 5-step hygiene methodology, utilising the latest technology to create the cleanest water possible.

Scan this code for more information about Totality®.

Filtration

High performance, easy-fit filtration reduces sediment, odours and chlorine, for clean, great-tasting water in every pour.

DryChill®

Reservoir-free, efficient, rapid chilling technology, featuring an airless coolant coil for safe, freshly-chilled water.

Viovandt®

Eco-efficient, chemical-free UVC water purification, utilising ultraviolet LED sterilisation to destroy bacteria and viruses.

Sterizen®

Antimicrobial and anti-pathogen sterilisation process, reducing bacteria by 99.999% for ultimate confidence.

Fynil®

Hard-wearing and non-porous finish with silver ion antimicrobial technology, for increased hygiene, easy cleaning, and longevity.

Assuring the quality and safety of our products are of the highest standards and complies with regulatory requirements.

Environmentally conscious.

Refreshingly kind
to the planet.

Since the beginning, sustainability has been at the heart of Borg & Overström as we aim to provide locally sourced and filtered drinking water, without the need for plastic bottles. We are proud to be certified ISO 4001 for our Environment Management Systems, and to hold an EcoVadis Silver accreditation for our commitment to corporate social responsibility and sustainable procurement.

As part of our ongoing efforts to become ever more environmentally friendly, our production facility operates on solar power and we prioritise recyclable materials in our packaging and components whenever possible, ensuring that we maintain a zero-to-landfill policy.

**Environmental
sustainability.**

Nearshore manufacture.

Supply chain stability with a reduced carbon footprint.

As part of our commitment to become an increasingly sustainable business, both the E4 and E6 dispensers are nearshore manufactured, with components being sourced from within Europe. This not only reduces the carbon footprint of each dispenser but also provides a more stable and agile supply chain, helping us to fulfil orders promptly and with fewer interruptions.

ISO certified

Certificate Number 13997
ISO 9001, ISO 14001

Dunnotar Castle, UK

Reducing plastic pollution.
Sustainable, bottleless,
premium drinking water.

With single-use drinks bottles washing up on our shores and littering our waterways, we must all embrace refillable culture and reduce our consumption of single-use plastic. You can enjoy freshly-filtered and locally sourced, premium drinking water and make a sustainable difference with a point-of-use bottleless water dispenser. One drinking water dispenser can eliminate around 35,000 single-use plastic bottles in its lifetime.

Better for you, better for the planet.

Different by design.
Premium finishes,
contemporary aesthetics.

Renowned for unique premium aesthetics and exquisite finishes, each of our drinking water systems are designed for the discerning eye. Built with durability in mind, we believe that functionality can be beautiful, and that great design makes for enjoyable experiences. We are proud to stand out from the crowd, with confident, contemporary profiles that pair practicality with desirability.

Evolution
through design.

In-house R&D.

Considered ergonomics,
cutting-edge technology.

Recognised for our industry leading innovations, each of our drinking water systems are designed and developed by our in-house, state-of-the-art research and development department. From cutting-edge technologies, uniquely designed systems and original equipment manufacturing capabilities, we are proud to develop and own our IP, for complete independence and agility. You won't find Borg & Overström anywhere else.

The E-Series.
Diligently
designed for
every environment.

Digital connectivity. Future-thinking, SIMSecure data insight.

Developed for improved efficiency and insight, secure, individual, SIM-connected data allows for real-time asset management, without the need or risk of a Wi-Fi connection. With access to remote diagnostics, dispenser settings, fault notifications and data insight, you can quickly and easily identify and resolve issues without setting foot on-site. Digitally intelligent customer service allows service personnel to arrive on-site informed and stocked with the correct parts for a first-fix.

Coming Fall 2023. Compatible with the E6, E7 and T3.

Dynamic data.

API integration.

Connect seamlessly with your existing systems and reporting.

Data understanding.

Monitor usage data, dispense volumes and temperatures.

SIMSecure.

No Wi-Fi, no risk, stand alone, individual unit smart SIM connectivity.

Smart service.

Remote diagnostics.

Instant error alerts and real-time service notifications.

Remote servicing.

Remote fault resolution and settings access.

First-fix faster.

Arrive on site informed and with the required parts.

Remote management.

Alerts and notifications.

Instant error alerts, real-time service & predictive maintenance notifications.

Asset management.

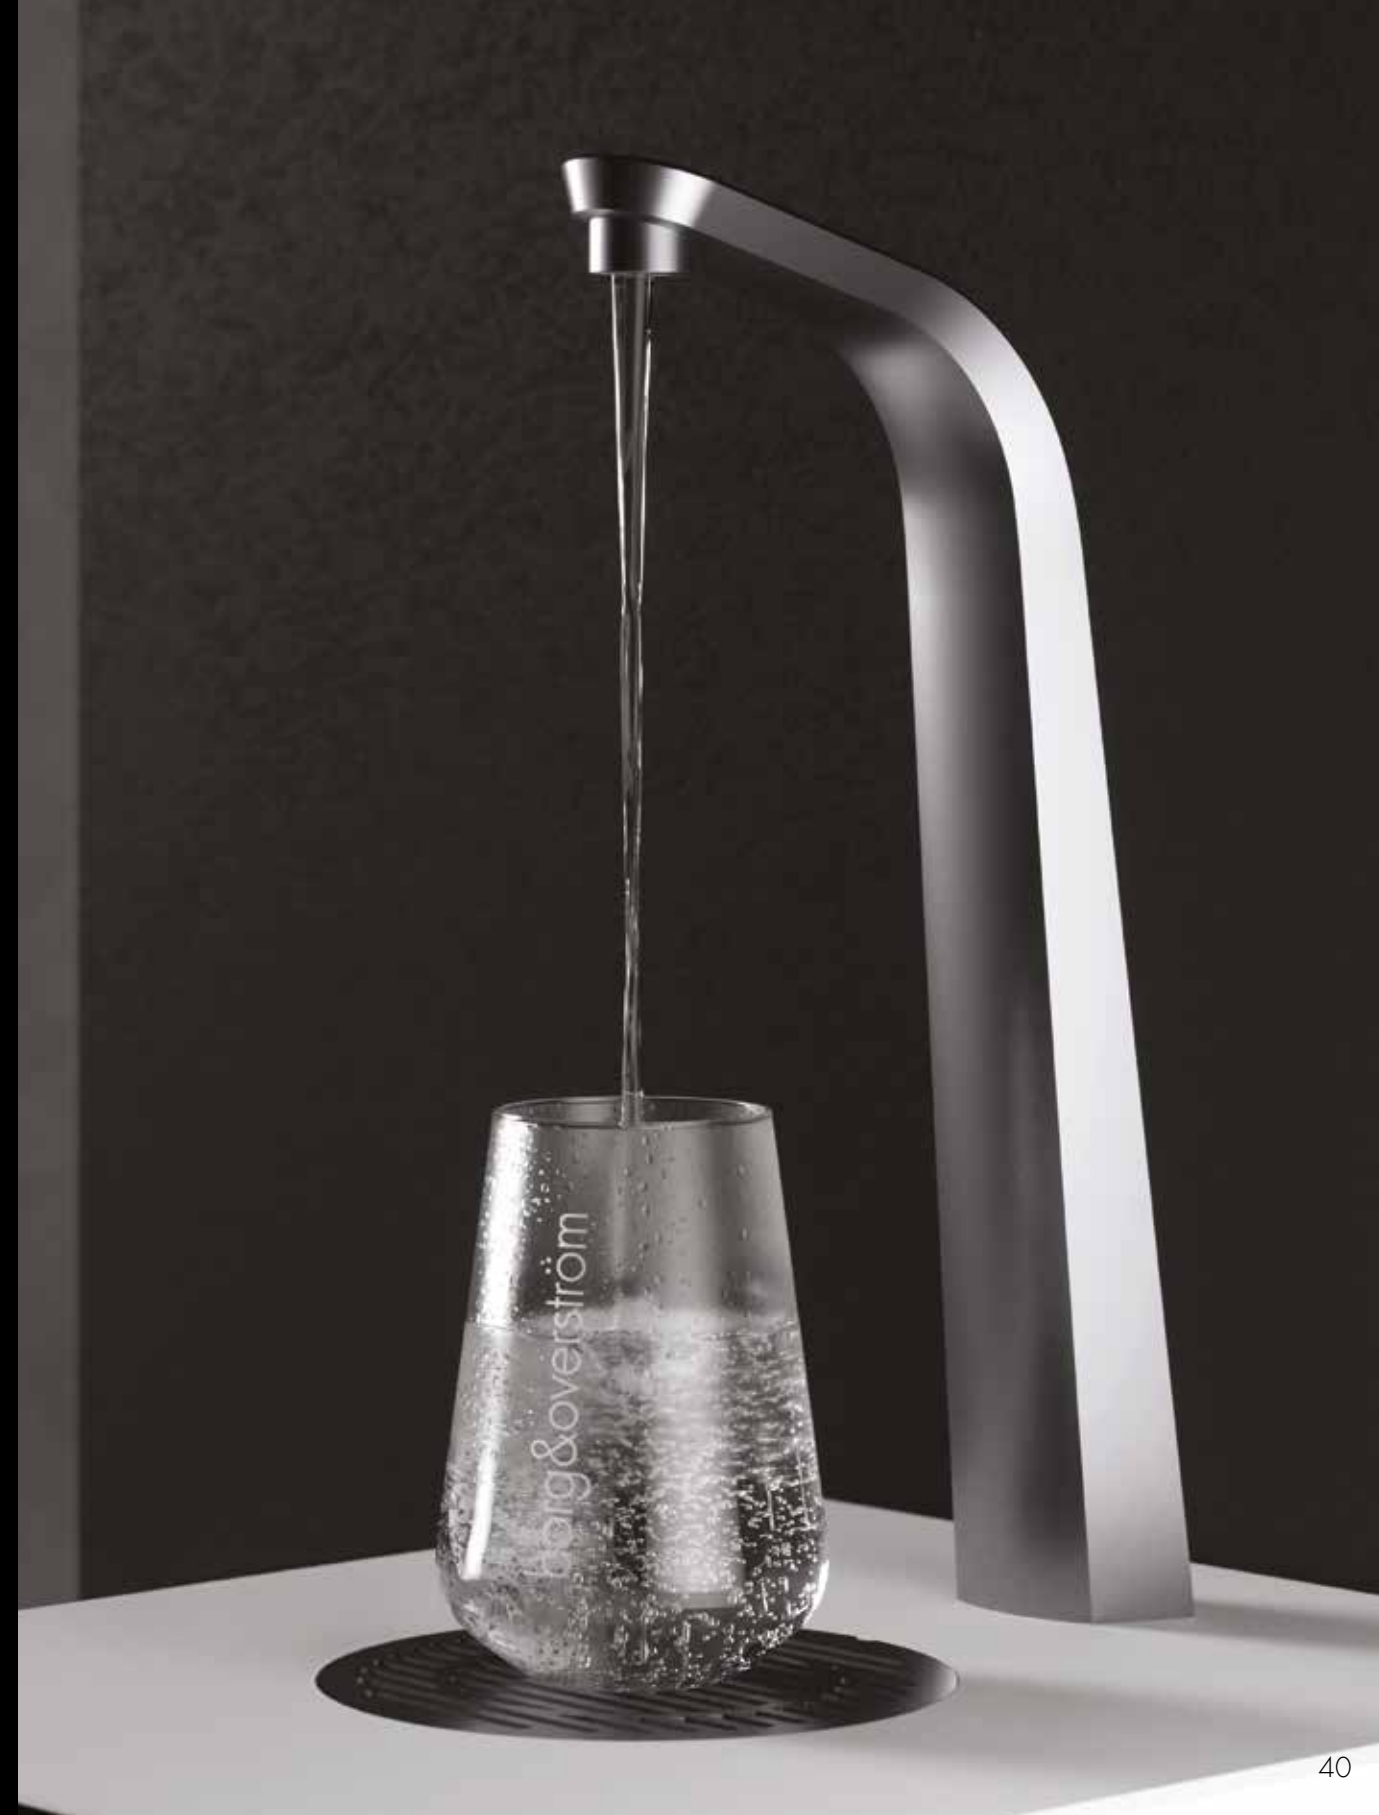

Real-time asset management with dispenser status, location & usage data.

DeepSparkle®

Experience the effervescence
of excellent sparkling water.

DeepSparkle® provides a long-lasting fizz for a deliciously effervescent glass of bubbly. Unique to Borg & Overström, DeepSparkle® is our unique sparkling water technology to give great taste with a satisfying pop, adding a little decadence to your refreshment service. Our unique recipe combines low temperatures with high-pressure saturation for an extended period of time, creating the perfect mix and long-lasting fizz.

Replacement CO₂ canisters are available in two sizes and are easy-to-fit and fully recyclable.

Distributor partnerships.

Powerful, proactive global partnerships for shared success.

We firmly believe that our success is built upon the success of our distributors. Working together in partnership and providing industry-leading support and innovation to our network of 400 dealers, allows us to bring extraordinary drinking water experiences to customers world-wide.

With a proven need for water dispensers across the globe, Borg & Overström strive to make it easy for our partners to do business with us and create growth out of premium water, no matter their size, scale, location or requirements.

Become a Borg & Overström distributor

Support & Training.

On-demand, technical advice.

It is important to us that the people selling our products are as passionate as we are. We offer full sales and technical training for all of our distributors so you can confidently sell and service our dispensers. Our customer and technical support teams are on hand whenever you need them, to ensure you are able to provide your customers with the best service. We also provide marketing materials and industry insights, sharing our knowledge and expertise to help you optimise your business growth.

Virtual showroom.

Experience Borg & Overström.

Our state-of-the-art virtual showroom, enables distributors and customers to experience the full Borg & Overström product range in an instant. As part of our steps towards being more sustainable, the digital demonstration area brings our expertise straight to your screen, where you can talk to our sales team, look inside the dispensers and discover all that Borg & Overström has to offer, all from the comfort of your desk.

Book a virtual showroom appointment

Accessories.

From parts and components to re-usable drinking bottles and installation kits, we stock everything you need to provide an excellent premium drinking water experience.

Deep Sparkle® CO₂ refills

Can be disposed via standard steel recycling or general waste. Requires CO₂ regulator with gauge.

Personal drinking bottles

500ml capacity in black. Comes with quick-release leak-proof cap and carry strap.

500ml glass bottles

Suitable for dishwashers and bottlewashers. A perfect fit for the E6. Stylish swing-top lid.

Alarmed Bluetooth® waste kit

This optional clever device emits an audible alarm at high water level and deactivates the control panel via Bluetooth.

Install kit with 3M filter

Install appliances simply and effectively in a wide range of applications. Complete with a 3M filter.

Sanitisation kit

Six monthly sanitising cycles ensure appliances function at the optimum hygiene levels.
