E6

Advanced water dispenser with EcoMode technology.

Technology

SensorBeam®

Projection touchless dispense.

Patented, projection technology.

Elevating the simple task of pouring a glass of water, patented SensorBeam® technology uses advanced projection mapping to illuminate dispense controls onto any floor surface. Powered by bright, low-power LEDs, SensorBeam® is energy efficient and will work on any surface. Effortless and elegant, simply place your foot over an illuminated button and fill your glass as if by magic. Patent no. GB2609293.

Completely touch-free dispense.

Designed for the ultimate in hygiene, SensorBeam® offers completely touch-free dispense for floor standing coolers. Compatible with the E-series, there are no pedals or buttons to touch or clean, just the beautiful simplicity of illuminated controls. Ideal for busy communal areas, or where hygiene is paramount, SensorBeam® provides safe and hygienic access to water within hospitals, workplaces and education environments.

Futuristic, projection mapping technology, for complete touch-free dispensing.

The detail.
