

F 1500 CSF

F 1500 CSF - Roll-in Freezer - Remote

Equipped with: Right hand hinged reversible door with positive handle and lock, heated floor in stainless steel

Roll-in cabinets are designed for temporary refrigerated storage within a production line, for example between blast chillers and refrigerated coldrooms. By utilising roll-in cabinets the refrigeration process is unbroken, ensuring time spent on manual handling and re-loading is kept to a minimum.

Roll-in cabinets are available as refrigerator or freezer, the former with two optional temperature ranges to choose from.

The refrigerators can be supplied with or without a floor and with isolated or glass doors. The freezers are available with isolated door and floor.
