

# Slimline Serve Over Counter Flash Range

## Product Description

The design of the Flash range means the unit is only 825mm deep making it ideal to go through most doors and to fit in smaller shops, the intelligent placement of the evaporator means that you get a 550mm deep deck, significantly more than on most slimline serve overs. The curved design of the front also makes it stand out from the crowd. A low volume fan ensure even cooling over the whole deck while not drying out food on display and rear sliding doors to the rear are fitted as standard and help keep the cold in. An ideal addition to a deli or cafe where space is at a premium but you need to maximise your display area.

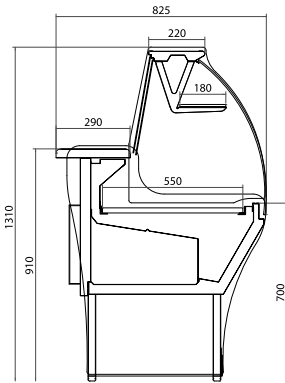

## Features and Benefits

- Fan Assisted Cooling
- Ambient Shelf
- Fully Automatic Operation
- Stainless steel interior
- Switchable interior light
- Digital temperature display and controller
- Refrigerated understorage
