

Quick Start Guide

Getting Started...

Your Adande is shipped pre-installed with the appropriate mains cable(s) as pictured below. Only the cables supplied should be used with the appliance. Simply plug in and the Adande will come ON. The Adande is shipped & pre-set to cool to 3°C; this is a standard fridge operating temperature.

Please allow to run for 30 mins before opening the drawer for the first time.

A spare socket is available to provide power to additional Adande units as required

Each Adande drawer has a unique 6 digit serial number, you'll need this to register your free 2-year parts and labour warranty. Details on how to register can be found on the reverse of this guide.

Note your six digit serial number(s) for future reference

Quick Start Guide

Temperature Control

The set-point is factory set to 3°C, however, should you need to adjust the temperature set point, please follow the procedure below

- First press and hold the set temperature button **i** this will display the current set point.

- To adjust the set point simply keep the set temperature button held down and press the **up ▲** or **down ▼** button until the desired set point is displayed.
 
- Next release all buttons and the screen will return to the current temperature screen. The temperature is now set. Max set point is +15°C
Min set point is 0°C

After registering the warranty, your Adande unit will be covered for parts and labour for 2 years from the date of purchase, subject to the terms of the warranty. If you have any query about your Adande unit, call the Adande Customer Care Helpline with your serial number and details of where/when you bought your Adande. Your serial number can be found on the back of the unit near the power cable. Most queries can be solved over the phone by one of our trained Adande Customer Care Helpline staff. Alternatively, you can email your query to: service@adande.com general tips and useful information about Adande can be found in the operations manual supplied with the unit.
