

HIGH EFFICIENCY

EFFICIENT - RELIABLE - INNOVATIVE

FULLY ENCLOSED 4 SIDED HOOD DESIGN - Exhaust Energy Storage!

Eliminates the need for a ventilation canopy, reduces installation costs, saves up to 3 kW per hour in energy consumption !

Hobart are unique in fitting fully enclosed 4 sided hoods to all pass-through dish and utensil washers. When the hood is raised, steam and heat are drawn up into the hood **and stored** instead of being released into the dishroom. Installation and running costs are significantly reduced. The optional hood insulation provides further energy savings of up to 0.5 kWh.

e.g.:

Energy saving of 3 kWh per hr. @ 12p/kWh = 36p/ hr.

Typical operation where machine in use for 5 hrs./day, 365 days = £657 p.a.

PLUS minimum £1000 to install a canopy !
