

ScanHeat

ISM-1800S ScanHeat™ Microwave

Super Durable & Reliable Use

Large capacity (17.9L) with oven cavity LED light. Great for monitoring the cooking status without opening the door.

Stainless steel body and cavity. Withstands the demands of a commercial environment.

EZ door handle with no moving parts, helps to extend the life span of the microwave oven.

Super Efficient Management With ScanHeat Software

The secret of efficiency lies in the QR codes or program file generated by the tailor-made software in which you can:

Add, edit, delete barcode menus.

Edit stage cooking process intuitively with clear visual guidance.

Setup the machine directly on PC/Mac instead of scrolling around on the display of the machine.

Super Consistent & Professional Cooking

1800 Watts of power with top and bottom energy feed.

11 power levels and 3 cooking stages for different cooking demands.

900 barcode menus ensure ultimate flexibility for customised cooking.

Super Easy & Handy Operation

Built-in scanner for ultimate ease of cooking setup. Perfect for self-service locations, hospitals, universities and the care home sector.

Laser scanner and USB port for effortless and consistent menu customisation.

Removable roof liner and air intake filter for easy cleaning and maintenance.

ScanHeat™ Microwave ISM-1800S

Specifications and Features

A microwave built for a wide range of self-serve environments. ScanHeat combines scanner technology and software for consistent, quality results every time and eliminates the risk of under or over-cooking. Perfect for kitchen HACCP due to the reduced number of operating touchpoints. An ideal solution for hospitals, universities, convenience stores, cafes, commercial kitchens and stadiums. The ease of use, efficient operation and unrivalled durability makes ScanHeat an essential addition to any commercial kitchen.
