

# NEW Intelli™ Blood Bank Refrigerators from

## Intelligently Designed for Safety and Security

Designed to work with any electronic blood tracking system, the new Intelli™ Blood Bank refrigerators from Labcold have been designed to only release the draw where the right blood type is stored, saving time and minimising errors.

This unique design of blood bank is manufactured by Labcold in the UK. As with all models in the Labcold blood product storage range, Intelli™ Blood Banks are fully compliant with BS 4376: Part 1; 1991 and are certified Medical Devices in accordance with Directive 93/42/EEC.

Available in a range of sizes from free standing twelve and nine door units to compact six and four drawer models, they are all built to the same high specification and have the following features:

- ❄️ **DuoCold** refrigeration system powered by an IntelliCold® controller
- ❄️ Hygienic LED touch screen control and temperature display
- ❄️ Internal light and LED lights on the drawers to guide the user to the correct compartment
- ❄️ Load alarm
- ❄️ Air alarm
- ❄️ Open door alarm
- ❄️ Mains fail alarm
- ❄️ Alarm battery back up
- ❄️ Remote alarm contacts
- ❄️ Electronic keypad entry
- ❄️ 7 day chart recorder

### DuoCold Technology

All Intelli™ Blood Banks are fitted with two separate refrigeration systems designed to work with each other to ensure the product is always kept at the optimum temperature:

- **DuoCold** means quick temperature recovery after door openings.
- **DuoCold** means there is a back up system capable of running the refrigerator at the optimum temperature.
