

# L03 Laundry Eco Booster

## Alkaline reinforcement for all textiles

Electrolux Professional Ecolabel range contains efficient and environmentally friendly ingredients. Meeting the requirements of ECOLABEL involves complying with extremely strict specifications, rigorous performance criteria, ultimate aerobic and anaerobic biodegradability and 100% recyclable packaging.

This product is part of a multicomponent system.

### Use:

L03 Laundry Eco Booster is an alkaline concentrated booster, used with a detergent for heavily soiled linen. L03 Laundry Eco Booster has a great washing action on all types of textiles and an important anti-deposit and sequestering power.

Do not use it on delicate laundry.

### Instructions for use:

- Wash at the minimal recommended temperature.
- Every time and for every kind of laundry, wash with the maximum weight possible.
- Follow the dosage instructions according to the water hardness and to the soiling levels.
- By using this product bearing the European Ecolabel in accordance with dosing recommendations, you help reduce water pollution and energy consumption.
- This product is included in a multi-components system.

### Recommended dosage for 1kg of laundry

To wash as efficiently as possible and avoid waste, we advise you to get information about water hardness level in your area and to follow the instructions below:

			
Soft water	5 g/kg	10 g/kg	15 g/kg
