

MILK PAL

Deep Cleaning Instructions using Cafetto Chill

Run this process at least once a month, or as needed.

Prepare the Cleaning Solution

Add 2 scoops (8g) Chill + 1L Warm Water

- Mix in clean jug and dissolve fully
- **Solution must be PINK**
- Leave for 1 min

Disassemble Components

Remove restrictor and 2 mesh filters from MilkPal outlet
Leave restrictor off during cleaning

Adjust Machine Settings

Go to "Advanced Settings", switch to "Continuous Mode"
Create new hot recipe/button, set air ratio to 0, set time to 8s

Run Cleaning Flush

Prepare the jug with solution
Place milk hose into cleaning solution and press new hot recipe/button
Run until pink solution exits outlet then stop

Rest & Repeat

Leave solution in machine for 1 minute then run again
Solution may exit as Red / Yellow / Orange
Repeat until solution turns Pink and 1L solution is used

If solution still exits as Red / Yellow / Orange

Prepare a fresh 1L batch of solution and increase rest time to 2 minutes
Run cleaning flush again and repeat until solution exits consistently Pink
Keep repeating until the solution exiting the nozzle runs consistently Pink

Rinse thoroughly by running another cleaning cycle with fresh water

Refit the restrictor and outlet
Delete the button/recipe created for cleaning
Set machine back to intermittent mode.
