

Back Bar

PD SS Range

Product Description

Pubs and restaurants rely on having quality back bar coolers. The Interlevin PD stainless steel range is made with efficiency and reliability in mind. We fit high quality German made EBM fan motors as well as condensers that are less liable to blocking. This means extra efficiency and peace of mind for your drinks cooling. The units come with locks as standard and have digital controllers and temperature display for easy operation. The controller is even behind a sliding plastic panel to protect it from the rigours of a busy bar.

Features and Benefits

- Fully automatic
- Fan assisted cooling
- Lock
- Adjustable shelves
- Mirror stainless interior
- Adjustable feet
- Interior light with switch
- Digital controller and temperature display
- Self closing doors
- High strength single piece stainless steel door frame (no joints at corners)
- Replaceable door gasket
- High quality EBM fan motors
- Condenser design less vulnerable to blocking
- Door not reversible
- PD20H SS is ECA approved for energy efficiency

Technical Specifications
