External Dimensions	WxDxH 905 x 646 x 380mm (530mm with rear up stand)
Area of Cooking Grid	800 x 500mm (4000cm ²)

THE RETURN ON INVESTMENT APPENDIX SYNERGY SG900 - VS - AVERAGE OF COMPETITOR GRILLS

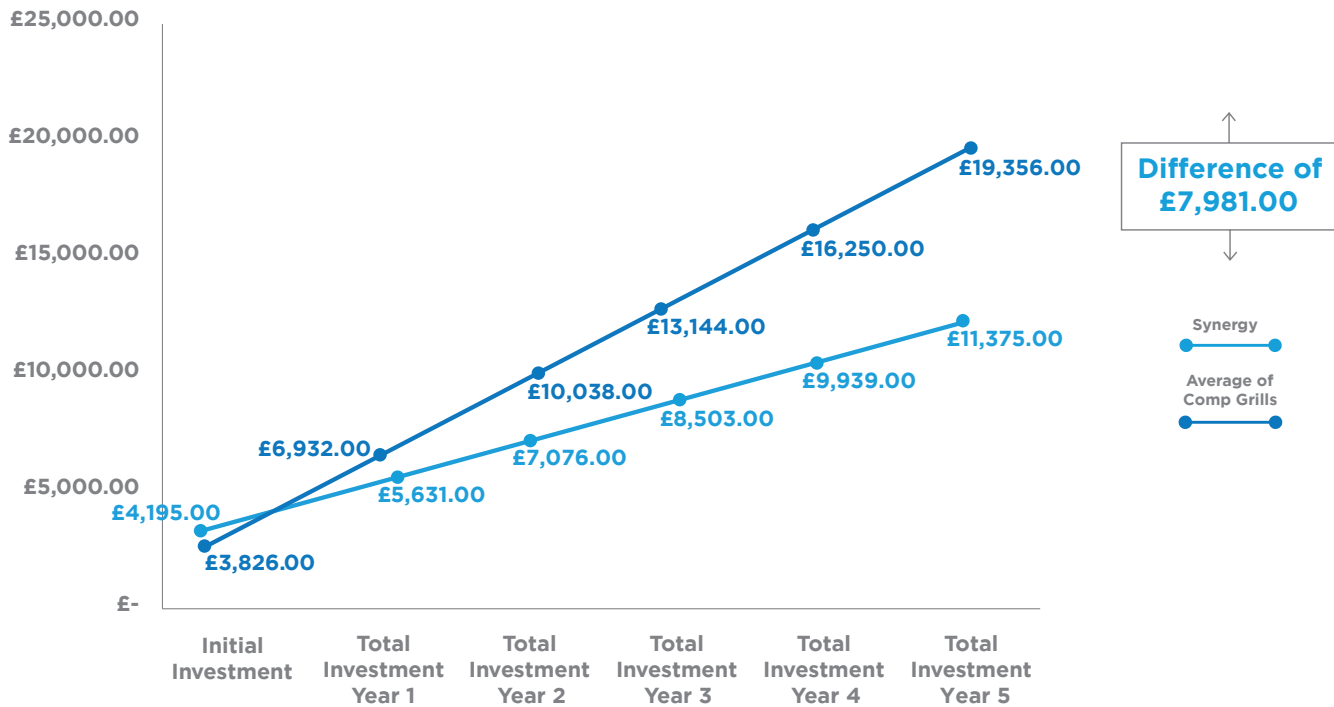

Gas savings comparing Synergy SG900 (11.4 kW) to Average of Competitor Grills 900 (24.65 kW).

Assumption: Capital Investment and Gas Consumption cost over 5 years based on Natural Gas purchased at average commercial rate of 3.5p per kW/h. The calculation is based on running for 10hours per day and 360 days per year.

If you buy an SG900, the savings in gas alone between running the Synergy Grill and the Incumbent grill will allow you to recoup your initial investment in Month 30.

If the investment decision is to buy either the Synergy Grill or the Competitor grill, the additional upfront cost of the Synergy Grill is covered in gas saving within 4 Months.

SAVINGS ON GAS ALONE, INCLUDING THE COST OF THE GRILL

A total overall cost savings in gas of £7,981.00 over a 5-year period. If gas prices rise, then the savings become even greater.
