

VIZU® MEGA AUTO BREADER

VI005MAB

- Motorised rotary sieve, for dividing re-usable breading mix & dough balls.
- 1-1 Gastronorm pan for dipping & 2-1 Gastronorm pan for breading.
- Easy to disassemble and reassemble for easy maintenance.
- Heavy duty polymer castors, lockable from operator's position.
- Integrated pan lid storage to help maintain a clear & tidy station.
- Suited to busy operations with high volume.

AUTO BREADER SPECIFICATION PAGE

MODEL VI005MAB

Dimensions	Machine
Height	1047 mm
Width	1038 mm
Depth	586 mm
Weight	50 kg
Electrical	1 phase , 50Hz AC, 230 V, 0.1 kw
Running Amps	
Connection Type	BESCHUKO Power cord
International Option	N/A

All Vizu® Mega Auto Breaders have been tested and checked for proper operation before leaving the factory.

Upon delivery please check the unit for damage. If the unit is damaged, contact the carrier, or Fast Food Systems, immediately and file a damage claim (found in the back of the manual). Please retain all packing materials.

Damage must be reported within 7 days of delivery

General Description

The Vizu mobile breading station is a motorised rotary sieve used for dividing re-usable flour & dough balls.

Assembly Instructions

1. Remove all packaging.
2. Remove any protective plastic covering from panels.
3. Wash all removable items in warm soapy water.
4. Wipe all surfaces with proprietary stainless steel cleaner, or a warm damp cloth.
5. Dry all items thoroughly.

Installation

Position the Auto Breader in desired position, close to a suitable electrical supply, lock wheels in position and connect to supply. The unit is supplied with a 13 amp, 3-pin UK plug, fitted with a 5amp fuse.

OPERATING INSTRUCTIONS

1. Remove steel plug from large pan.
2. Using the steel plug push the breadding through the hole onto the sieve.
3. Once the sieve compartment is full – or you have added enough breadding for your requirements replace the stainless steel plug.
4. Press the 'red' ON/OFF emergency stop button. The countdown timer will now be illuminated showing the factory pre-set of 15 seconds. If this display is not illuminated check that the machine is plugged in and wall switch is on.
5. Make sure the tray and ½ trays are in position on the slides under the shelf of the machine.
6. Press the 'green' switch and the machine will run. (FIG.1)

Figure 1: Green button to turn on machine.

DO NOT LIFT PLUG OUT AS BREADING WILL BE FLICKED OUT WHICH IS POTENTIALLY DANGEROUS

7. If the machine needs to be stopped press the 'red' ON / OFF emergency stop button. This will stop the machine. It will be switched off and display will not be illuminated.

8. To resume operation the 'red' button will need to be pulled out to switch the machine back on.
9. Repeat step 6
10. Once the machine has run through its program, the display will re-set to its start time of 15 seconds. If the machine is required again, repeat step 1 – 9 otherwise presses the 'red' button to switch OFF.
11. The sieved breadding will now be in the bottom tray – ready for use.

Note: - Due to the double action of the 'Red' push button care must be taken to only push once when stopping the machine, to avoid re-energising of the unit.

CLEANING INSTRUCTIONS

- Disconnect from power supply.
- Remove the stainless steel pans and wash in warm soapy water, dry thoroughly with a soft dry cloth.

- Remove both pan supports from the Breeder frame
- Lift the lid off the sieve

- Unlatch the drop catch on the side of the motor box and slide the motor box over 2 to 3 inches. This disengages the motor.

- Holding the breading compartment the brush can now be slid back in the direction of the drive side – removing the end of the shaft from the bearing on the breading

compartment.

- The brush can now be lifted out.

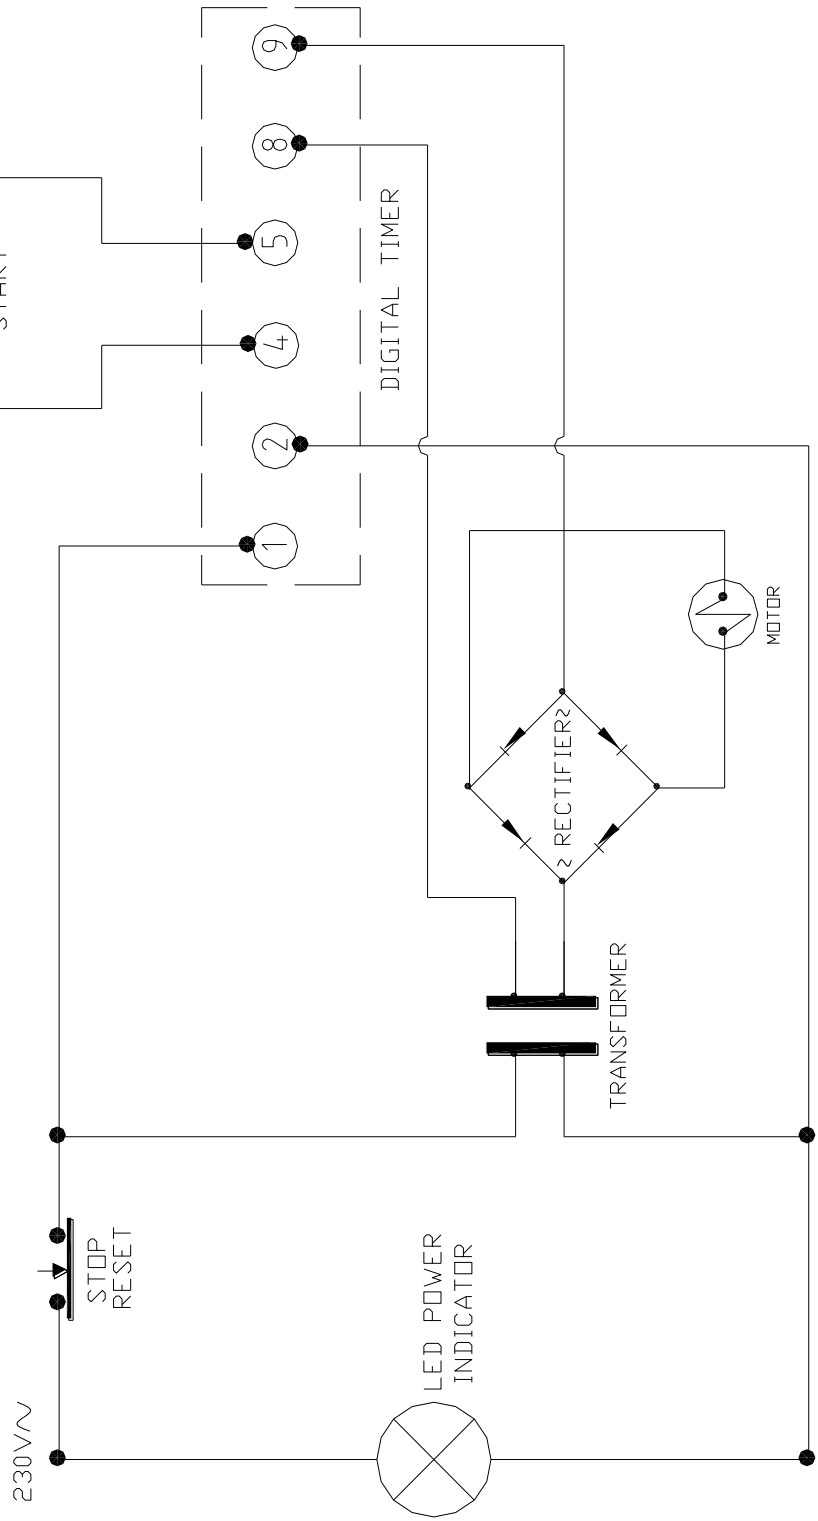

Once all the parts have been removed they must be washed in warm soapy water to remove all traces of flour and breading mix.

The machine should NOT be re-assembled until all the parts have been thoroughly dried. Follow steps 1 – 8 in reverse order.

Warranty

UNITED KINGDOM AND REPUBLIC OF IRELAND

Excepting where otherwise specified all products are subject to 12 months parts and labour warranty. Goods found defective will be repaired, credited or replaced without charge according to the terms of the Company's standard warranty, provided written notice is given within the guarantee period. In no case will the company be liable for repairs made without its knowledge or sanction, or for indirect damage, or any consequential loss or expense incurred by purchasers.

Fast Food Systems Ltd, warrants to the original purchaser that the equipment supplied to be free from defective materials or workmanship for a period of 12 (twelve) months.

The following are NOT covered by warranty:

1. Failure or breakdown caused by incorrect installation.
2. Glass parts, electric lamps or door seals.
3. Adjustment or calibration of controls - this is a routine maintenance function.
4. Abuse or misuse, including cleaning.
5. Warranty labour is only carried out during normal working hours; calls attended to out of hours may be subject to surcharges.
6. The warranty will commence either on installation or 1 (one) month from date of dispatch - whichever is the sooner.
7. Warranty on spare parts purchased for equipment outside of the warranty period is 3 (three) months from date of sale.
8. Any faulty spare parts replaced under warranty must be returned with 7 days of supply.
9. Warranty is non-transferable.

Fast-Food-Systems Ltd will not be held responsible, financially or otherwise, for any loss of business as a result of equipment breakdown.
